

ALOTTA

CWSP WHEAT

Alotta is a very high-yielding CWSP wheat combining large red kernels, very good sprouting tolerance and strong stripe rust resistance.

Quick Facts

Availability	Available
Yield	116% (AAC Brandon)
Maturity	+1 day (AAC Brandon)
Protein	-2.1% (AAC Brandon)
Height	82 cm
Lodging	G

Why It Stands Out

- **Very high yield potential**
- **Large red kernels**
- **Very good sprouting tolerance**
- **Stripe rust resistance**

Our Experience

We like Alotta for its very high yield potential, strong kernel characteristics and very good sprouting tolerance. It is a good fit for farms pushing for top-end yield.

Considerations

- Lower protein than AAC Brandon (-2.1%)
- Bunt rating: I
- FHB rating: MS
- Later maturity (+1 day vs. AAC Brandon)

ALOTTA

Published Agronomic Characteristics

Yield	116% (AAC Brandon)
Maturity	+1 days (AAC Brandon)
Protein	-2.1% (AAC Brandon)
TKW	49 g
Height	82 cm
Lodging	G
Sprouting	VG
Bunt	I
Strip Rust	R
FHB	MS

Rating Legend

R = Resistant · MS = Moderately Susceptible · I = Intermediate · G = Good · VG = Very Good
