

SY MANNESS

CWRS WHEAT

SY Manness is an earlier-maturing CWRS wheat combining short straw and very good standability in a compact, manageable plant type.

Quick Facts

Availability	Available
Yield	98% (AAC Brandon)
Maturity	-1 day (AAC Brandon)
Protein	-0.4%% (AAC Brandon))
Height	81 cm
Lodging	VG

Why It Stands Out

- **Early maturity**
- **Very good standability**
- **Good sprouting tolerance**
- **Solid disease package**

Our Experience

We've had good yield and success with SY Manness on our farm and especially appreciate its shorter stature, strong standability, and the ease it brings at harvest time.

Considerations

- Lower protein than AAC Brandon (-0.4%)
- Weaker disease package
