

ACC JULIUS

YELLOW PEA

AAC Julius is an early-maturing yellow pea combining solid yield potential, higher protein, good standability and strong seed quality characteristics.

Quick Facts

Availability	Available
Yield	101% (CDC Amarillo)
Maturity	E (Early)
Protein	+0.4% (CDC Amarillo)
Standability	3.3
TSW	210 g

Why It Stands Out

- **Solid yield potential**
- **Early maturity**
- **High protein**
- **Good standability**
- **Strong seed quality characteristics**
- **Strong nitrogen fixation**

Our Experience

We appreciate AAC Julius for combining strong yields, earlier maturity and higher protein with excellent seed quality characteristics such as reduced bleaching, seed coat damage and dimpling.

Considerations

- Smaller seed size (TSW: 210 g)
- Mycosphaerella blight rating: 4.1
- Fusarium root rot rating: MR

ACC JULIUS

Published Agronomic Characteristics

Yield	101% (CDC Amarillo)
Maturity	E (Early)
Protein	+0.4% (CDC Amarillo)
TSW	210 g
Standability	3.3
Mycosphaerella Blight	4.1
Fusarium Root Rot	MR
Bleaching	G
Seed Coat Breakage	G
Dimpling	G

Rating Legend

MR = Moderately Resistant · G = Good
